

American Society of Cataract and Refractive Surgery Congress (ASCRS)

More than 600 ophthalmologists visited the Carl Zeiss booth at this year's ASCRS in San Francisco, California, USA, to view the latest innovations in ophthalmic technology, including the Visante OCT anterior segment imaging device, VISUCAM^{PRO NM} non-mydratric fundus camera, the new CRS-Master, Superlux Eye Xenon Illumination and the Invertertube™ for the OPMI VISU microscope and IOLs.

Carl Zeiss also sponsored four educational events where panel discussions, case studies, and clinical applications were presented by thought leaders in ophthalmology. Please visit us at www.meditec.zeiss.com/videos to view video presentations from these events.
