

Carl Zeiss Meditec Features Symposia and Product Developments at ESCRS

The 24th Congress of the European Society of Cataract and Refractive Surgeons (ESCRS) took place in London September 9-13, 2006.

Carl Zeiss Meditec sponsored two symposia — the Structure and Function Symposium and the Innovation Symposium. The symposia were attended by more than 400 attendees.

In the industry exhibition, Carl Zeiss Meditec presented instrument systems for the four primary clinical areas of eye disease. The presentations focused primarily on new developments. These included: the Visante OCT, Mel 80 with new CRS Master, IOLMaster XP, MediLive Trio Eye, ETHOS, XL Stabi ZO and INVENT ZO. Interest and booth attendance were high.

With 4,000 current members from more than 90 countries, the ESCRS is the leading international organization in cataract and refractive surgery. Altogether, 180 exhibitors participated.
